Hazardous Weather

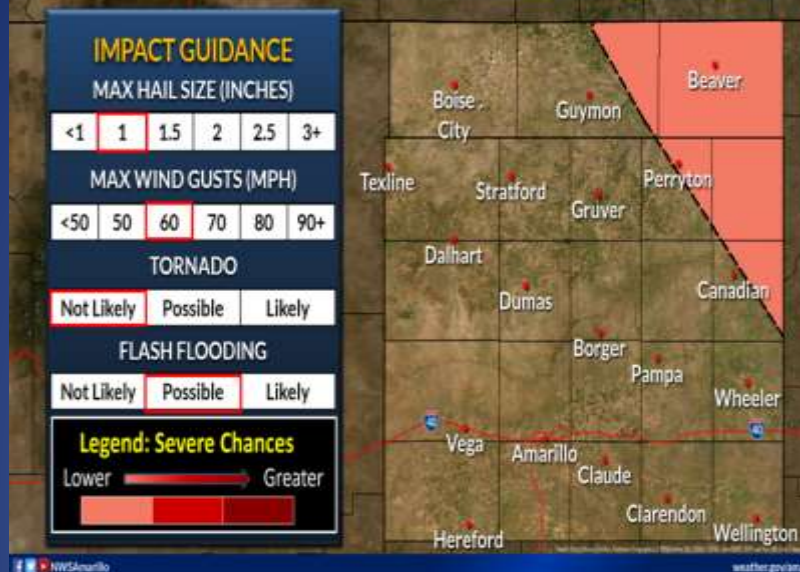

Hazardous Weather

Severe Thunderstorm Potential - 3 pm to 11 pm

Flash Flooding is Possible today for all of the Panhandles, not just within severe storms. Any storm could produce flooding.

Weather Forecast Office
Amarillo, TX
Issued Jul 18, 2021 4:58 AM CDT

Severe thunderstorms are possible this afternoon and evening for hail and damaging winds favoring the NE Panhandles. However, severe or non severe storm, flooding is possible today for the Panhandles with any slow-moving thunderstorm. This may continue through tonight as well.

Scattered thunderstorms possible this afternoon

Locally heavy rainfall can be expected in the strongest storms

Weather Forecast Office
Lubbock, TX
Issued Jul 18, 2021 3:40 AM CDT

The development of scattered thunderstorms is expected this afternoon across the Caprock and Rolling Plains. Locally heavy rain will accompany the strongest storms, which may lead to a localized risk for flash flooding. Rain rates may reach up to two inches per hour. Isolated strong to damaging wind gusts up to 60 mph will be possible, but the overall threat for severe weather is low.

Hazardous Weather

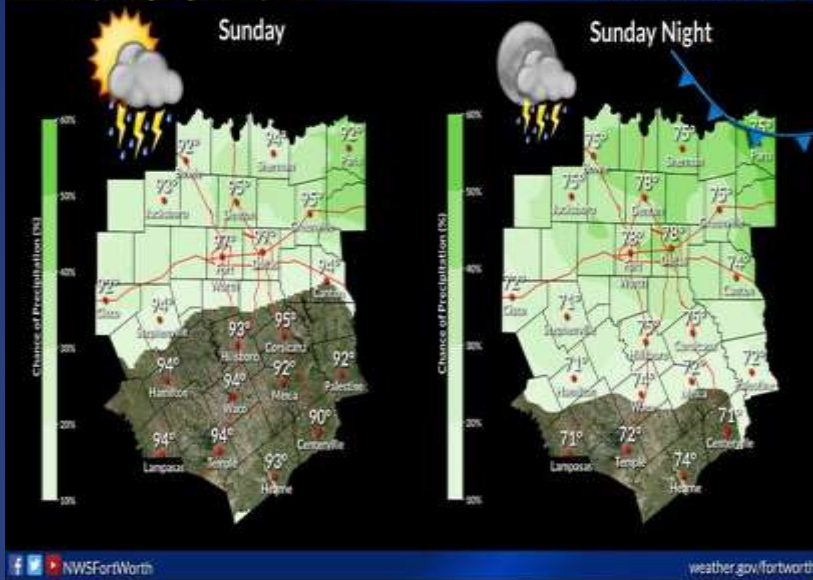

Increasing Thunderstorm Chances

Hazards: Gusty wind, lightning, brief heavy rainfall

Weather Forecast Office

Fort Worth, TX

Issued July 18, 2021 4:15 AM CDT

Today (Sunday) will be partly cloudy and seasonably hot with highs generally in the lower and middle 90s. Isolated to scattered thunderstorms are possible today across North Texas with storm chances increasing for most of the region tonight. Severe weather is not expected but gusty winds, lightning and brief heavy rainfall will be possible. Lows tonight will be in the 70s.

Slightly Below Normal High Temperatures

Isolated Afternoon Showers and Thunderstorms Coastal Plains

Weather Forecast Office

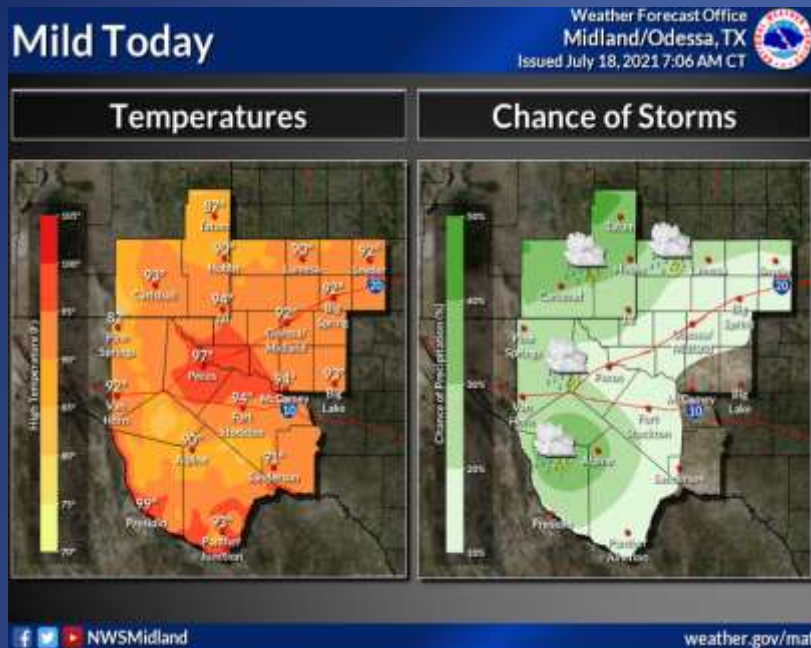

Austin/San Antonio, TX

Issued Jul 18, 2021 4:10 AM CDT

Slightly below normal high temperatures continue today. Mostly cloudy skies this morning yield to partly cloudy skies this afternoon. Isolated showers and thunderstorms are possible near the Coastal Plains this afternoon.

Hazardous Weather

Temperatures mostly in 90s with isolated to scattered storms across the area.

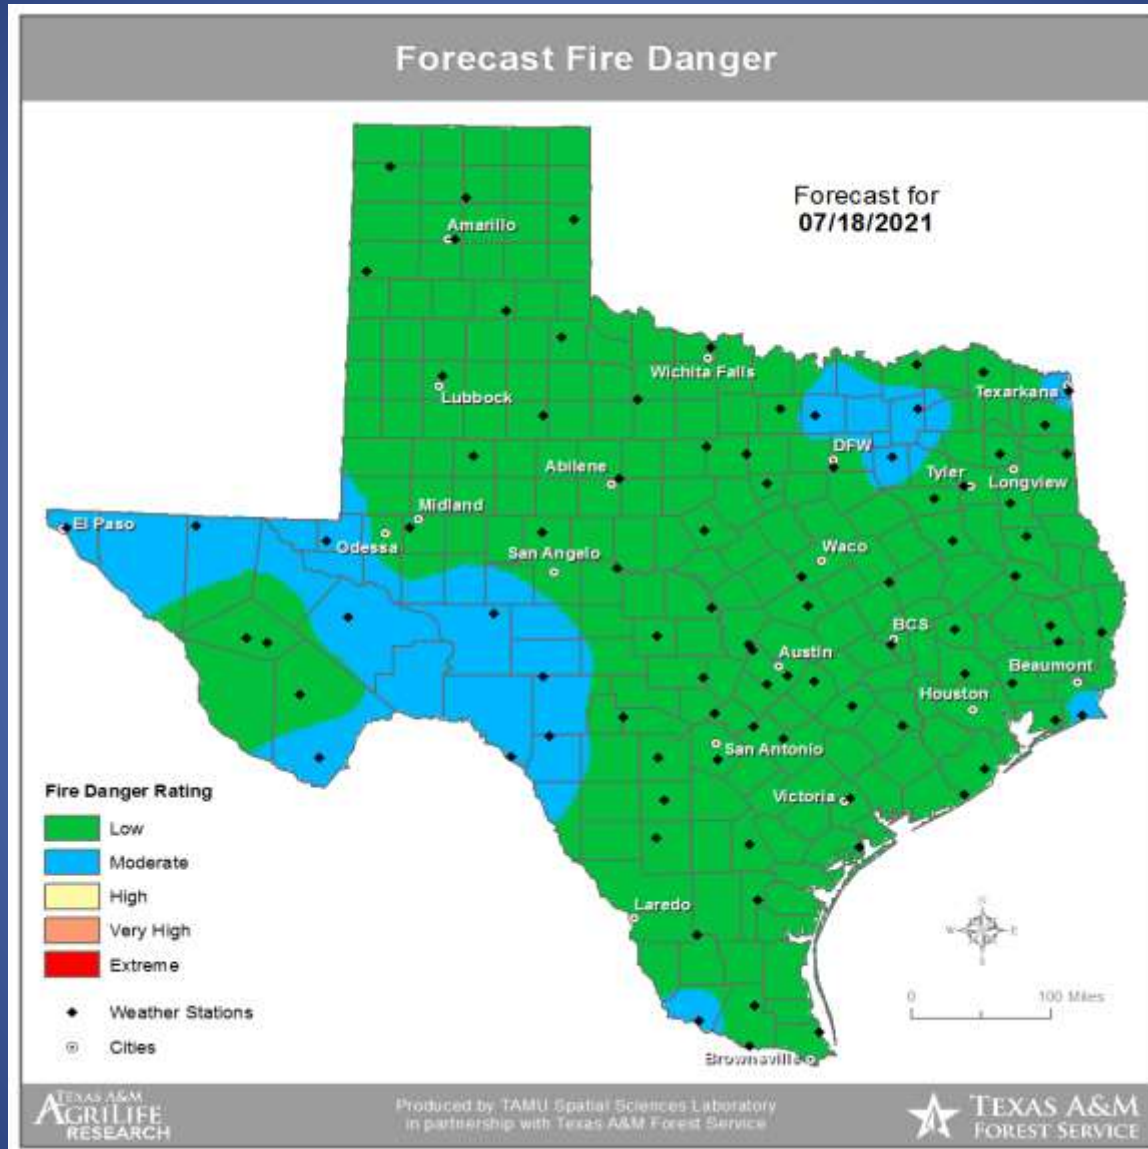

More heavy rainfall will be possible over the mountainous terrain of southern New Mexico on Sunday and Sunday Evening. Rain totals of 1 to 2 inches are possible across portions of the Lincoln National Forest and Gila Wilderness. This could lead to flash flooding, especially in areas that have already received a lot of rain. Please do not drive through flooded roadways. Turn around. Don't Drown.
